

SOME COMMON HEALTH CAREER FIELDS & CAREER TRACKS:

Many of these careers will require additional training in specialty areas after students graduate from the program. However, students can get a head start by selecting courses in their health science options that will help them pursue their chosen career tracks. One good way is to search for schools that offer these programs/careers on the Internet and then look for course requirements. Students should work closely with their advisers as they select the relevant courses.

<i>Anaesthesiologist Assistant</i>	<i>Kinesiotherapist</i>
